

## Simple Form

This is a sample form that we will create using Adobe Acrobat Professional. While we can use word processing applications to enter the text content, we will need to use Acrobat Professional to create the interactive form elements. We will also need to use Acrobat to ensure the information is accessible.

**First Name:**

**Last Name:**

**Address:**

**E-mail:**

**The information provided above is:**

True

False

**I use the following web development tools (check all that apply):**

Microsoft FrontPage

Dreamweaver 8

NotePad
